## SUBJECT INDEX

**A**

Ablation, cardiac tissue, 224
Acute and critical care, boundaries, 163
Advanced nursing practice, 17, 80
Advocates, patient, nurses as, 167
Aggression in relatives, managing, 108
Amphotericin, 173
Analgesia after heart surgery, patient- vs. nurse-controlled, 126
Antibiotics, *H. pylori* eradication, 121
Aredia (pamidronate) in malignant hypercalcaemia, 58
Arrhythmias, cardiac
  concept analysis of trust, 351
  electrophysiology studies and ablation procedures, 224
Axilla for core body temperature measurement, 266

**B**

Behavioural difficulties of relatives, managing, 108
Benzodiazepines (children), adverse reactions, 181
Biphosphonate in malignant hypercalcaemia, 58
Blood gas analyser, Paratrend 7 continuous, 328
Body temperature measurement, core, 266

**C**

Cancer, pamidronate in hypercalcaemia of, 58
Cardiology, *see* Heart
Cardioverter defibrillator, automatic internal, psychological and emotional impact, 316
Caring seen as feminine trait, 65
Catheters
  cardiac ablation using, 224
  in liver transplant patients, closed-system suction, microbial colonization, 72
  pulmonary artery, *see* Pulmonary artery catheterization
  sepsis with, dressing permeability and, 26
Central venous catheter-related sepsis, dressing permeability and, 26
Cerebral haemodynamics in fulminant hepatic failure, effects of endotracheal suctioning on, 198
Change, anticipating and coping with, 125
Children (in ICU)
  experience of, 49
  family of, changing nurses' perceptions of, 145
  opioid and benzodiazepine withdrawal, adverse reactions, 181
  retrieval team, setting up, 99
  short-term care in general ICU, case for, 53
  withdrawing treatment, 103
Clinical information systems, *see* Information systems
Clinical nurse specialist, follow-up services and development of, 243
Collaborative practice, 60
Competencies in critical care, 1
Core body temperature measurement, 266
Coronary care, concept analysis of trust, 351

**D**

Death, inevitable, experiences of caring with, 189
Defibrillator, automatic internal cardioverter, psychological and emotional impact, 316
Dependency scoring, 282
Dignity and ethical difficulties, 135
Docetaxel, 119
Dressing permeability and central venous catheter-related sepsis, 26
Drug abusers, 324
Duodenal ulcers, *H. pylori* eradication, 121

**E**

Ecstasy, 365
  rhabdomyolysis and development of acute renal failure, 216
Electronic clinical information system, 289
Electrophysiology studies, cardiac, 224
Emotional impact of living with automatic internal cardioverter defibrillator, 316
Emotional needs of patients/family, meeting, 111
Endotracheal suctioning, effects on intracerebral haemodynamics in fulminant hepatic failure, 198
Ethical problems
  dignity and, 135
  terminal weaning, 156
  withdrawing treatment from critically ill child, 103
Extubation following cardiac surgery, 77

**F**

Family/relatives
  aggression, managing, 108
  of children, changing nurses' perceptions of, 145
  meeting needs
    informational/psychosocial/emotional problems, 111
    in Spanish ICU, 12
Feminine trait, caring seen as, 65
Follow-up services and development of a clinical nurse specialist, 243

**G**

Gastric ulcer disease, *H. pylori* eradication, 121
Gender in nursing, 65
Guillain–Barré syndrome, 42

**H**

Haemodynamics, intracerebral, in fulminant hepatic failure, effects of endotracheal suctioning on, 198
Head injury care, 329
Heart, *see also* Cardioverter defibrillator; Myocardial infarction
  arrhythmias, *see* Arrhythmias

 © 1997 Harcourt Brace and Co. Ltd

disease (in general), concept analysis of trust, 351
surgery
extubation following, 77
patient- vs. nurse-controlled analgesia, 126
*Helicobacter pylori* eradication, 121
Hepatic failure, fulminant, effects of endotracheal suctioning on intracerebral haemodynamics in, 198
Hepatic transplant patients, closed-system suction catheters in, microbial colonization, 72
Hopelessly ill patients, experiences of nurses caring for, 189
Hypercalcaemia, malignant, pamidronate in, 58

**I**

Infections, *see also* Polyneuropathy, post-infectious
central venous catheter-related, dressing permeability and, 26
respiratory, risk with closed system suction catheters in liver transplant patients, 72
Information systems, clinical, 63
electronic, 289
Informational needs of patients/family, meeting, 111
Injury, head, 329, *see also* Stab wounds
Intracerebral haemodynamics in fulminant hepatic failure, effects of endotracheal suctioning on, 198

**K**

Kidney failure, acute, ecstacy-induced rhabdomyolysis and development of, 216

**L**

Legal issues, withdrawing treatment from critically ill child, 103
Liver, *see under* Hepatic

**M**

Malignancy, pamidronate in hypercalcaemia of, 58
Masculine trait, technology seen as, 65
MDMA, *see* Ecstasy
Mechanical ventilation, *see* Ventilation
Microbial colonization of closed-system suction catheters in liver transplant patients, 72
Mobile telecommunication equipment, sensitive patient-connected medical devices and, 170
Models, nursing, guiding practice in intensive care units, 93
Myocardial infarction
concept analysis of trust, 351
sexual activity after, education on resuming, 2

**N**

Narratives of critical illness, childrens', 49
Neuman systems theory, sensoristrain and, 249
Nitric oxide, 87
Nurse practitioners, advanced, 17, 80
Nurse specialist, clinical, follow-up services and development of, 243

**O**

Opioid withdrawal (children), adverse reactions, 181

**P**

Paediatrics
retrieval team, setting up, 99
withdrawing treatment from critically ill child, 103
Pamidronate in malignant hypercalcaemia, 58
Paratrend 7 sensor, 328
Patient advocates, nurses as, 167
Patient-controlled analgesia after heart surgery vs. nurse-controlled infusional analgesia, 126
Peptic ulcer disease, *H. pylori* eradication, 121
Pneumonia, nosocomial, risk with closed system suction catheters in liver transplant patients, 72
Pneumothoraces from multiple stab wounds, management, 341
Poisoning, ecstasy, *see* Ecstasy
Polyneuropathy, post-infectious, 42
Positive pressure ventilation, physiological changes, 293, 357
Practitioners, advanced, 17, 80
Professional progress and potential pitfalls, 241
Psychological impact/disturbances, 209
with automatic internal cardioverter defibrillator, 316
Psychosocial needs of patients/family, meeting, 111
Pulmonary artery catheterization, 230
for core body temperature measurement, 266

**R**

Recreational drug users, 324
Relatives, *see* Family
Renal failure, acute, ecstasy-induced rhabdomyolysis and development of, 216
Respiratory infection risk with closed system suction catheters in liver transplant patients, 72
Respiratory management with multiple stab wounds, 341
Retrieval team, paediatric, setting up, 99
Rhabdomyolysis, ecstasy-induced, and development of acute renal failure, 216
Role of nurses in ICU, 151

**S**

Sedation scoring protocol, 130
Sensoristrain
concept analysis, 209
in context of Neuman systems theory, 249
Sepsis, central venous catheter-related, dressing permeability and, 26
Sex (gender) in nursing, 65
Sexual activity after myocardial infarction, education on resuming, 2

Spanish ICU, meeting needs of family members of the critically ill in, 12
Specialist and advanced practitioners, 17, 80
Stab wounds, multiple, respiratory management, 341
Statistical significance, 259
Stomach ulcers, *H. pylori* eradication, 121
Substance abusers, 324
Suction catheters in liver transplant patients, closed-system, microbial colonization, 72

**T**

Technology seen as masculine trait, 65
Teicoplanin, 308
Telecommunication equipment, mobile, sensitive patient-connected medical devices and, 170
Temperature measurement, core body, 266
Thrombolysis, development of unit guidelines, 30
Tracheal suctioning, effects on intracerebral haemodynamics in fulminant hepatic failure, 198
Transplantation, liver, closed-system suction catheters following, microbial colonization, 72
Transport, setting up paediatric retrieval team, 99
Trauma, *see* Injury
Trust in coronary care, concept analysis of, 351
Tympanic membrane in core body temperature measurement, 266

**U**

Ulcer, peptic, *H. pylori* eradication, 121

**V**

Venous catheter-related sepsis, central, dressing permeability and, 26
Ventilation (assisted/mechanical)
  ethical considerations with terminal weaning from, 156
  positive pressure, physiological changes, 293, 357
Violent behaviour of relatives, prevention, 108

**W**

Weaning from mechanical ventilation, terminal, ethical considerations, 156
Withdrawing treatment from critically ill child, 103

# AUTHOR INDEX

**A**

Abbatt S, 289
Adams DH, 72
Albarran JW, 2
Ashworth P, 1, 63, 179, 241, 315
Asiain MC, 12
Atkinson B, 125

**B**

Baggs JG, 60
Ball C, 17, 243
Bennett J, 53
Black P, 209, 249
Bowyer J, 130
Bridger S, 2
Brown R, 126
Burchmore NA, 341
Burgess, 170
Buxton E, 130

**C**

Carnevale FA, 49, 181
Clarke R, 130
Clutton-Brock TH, 338
Coakley J, 243
Cornock MA, 42
Cunningham M, 216

**D**

Davies A, 170
Davies N, 77
Deeny P, 209, 249
Ducharme C, 181
Dyer I, 259

**E**

Elliott TSJ, 26, 72

**F**

Fulbrook P, 266

**G**

Gibson JME, 163
Gilje F, 135
Graystone SJ, 338

**H**

Hall CA, 329
Hams SP, 351
Hart P, 130
Hendry SP, 338
Heskins FM, 65
Hughes M, 72

**J**

James JE, 316
Jones C, 324

**K**

Kynman G, 30

**L**

Lane P, 224
Leighton H, 198
Lemmer B, 273

**M**

McKenna H, 209, 249
McMahon-Parkes K, 42
Margall MA, 12
Maunder T, 108
Maxton FJC, 135

**N**

Neenan TC, 80
Norberg A, 135
Norrie P, 167

**O**

O'Halloran P, 126
O'Riordan B, 273
Otano C, 12
Owens D, 324

**P**

Perochena MP, 12
Purcell C, 103

**Q**

Quirke S, 130

**R**

Reynolds MG, 26
Robb J, 293, 357
Robb YA, 93, 156

**S**

Saich C, 338
Simpson SH, 189
Smith JH, 243
Smith R, 170
Söderberg A, 135
Sperrin M, 170
Storey LJ, 230

**T**

Taylor T, 99
Tebbs SE, 26
Thruston I, 130

**W**

Wardle B, 282
Waterworth L, 289
Wesson JS, 111
Woodrow P, 87, 151
